# FULWOOD'S Frost Proof CABBAGE PLANTS

Ready September  
1st to June 1st

## EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best Cabbage grown. Its merits are many, among which are medium heads, for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker.

## COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few outer leaves, of an upright growth. My stock of this popular variety is extra early, uniform and dependable.

I am buying cabbage seed from Ferry-Morse Seed Co., paying twice as much as other growers pay for their seed. I do this to give you the very best plants that will be uniform in size, head up true to name. In fact, this is the very finest seed that can be used, and you could not take chances on planting any plants except those you know would give you perfect satisfaction.

WRITE FOR PRICES ON LARGER LOTS

## CHARLESTON WAKEFIELD

This Cabbage is much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a desirable variety for shipping purposes as the heads are solid and firm. It is a strong favorite with growers for a main crop.

## GOLDEN ACRE

Golden Acre is very similar to Copenhagen Market, being a few days earlier. The plants usually produce marketable heads in 65 to 70 days, which is as early as the Early Jersey Wakefield. It is a round headed variety for market gardeners and shippers.

# FULWOOD'S GENUINE Frost-Proof PLANTS

Ready Sept. 1 to June 1  
Wilt-Resistant Varieties

**YELLOW RESISTANT**

## MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important mid-season yellows-resistant sort of Cabbage for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail.

**YELLOW RESISTANT**

## WISCONSIN ALL SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants out of standard All-Seasons grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities and it is well adapted for kraut and for winter use.

## EARLY FLAT DUTCH

One of the oldest varieties. The head is usually large and flat, tender and fine grained. My strain of this Cabbage is of the best to be had. It is excellent for a tonnage crop because of the large heads.

## GEORGIA BLUE STEM COLLARD PLANTS

These plants are very much like the Cabbage plants. They grow from two to three feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

Money saving postpaid plant collections will be found on next to the last page  
in this catalog.

# FULWOOD'S GENUINE Frost-Proof ONION PLANTS

LIKE all Genuine Fulwood Vegetable Plants, my Onion plants are grown, packed and shipped with the utmost care and precision. Plants are grown from the finest seed I can obtain. All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent

money crop, as they can be marketed at least two weeks in advance of Onions grown from sets and way ahead of Onions grown from seed. Furthermore, my plants will make much better Onions than those grown from sets, the Onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants, and you can order them for shipment at the same time. My Onion plants are not to be confused with cheap Texas plants kept on storage. Order my fresh pulled plants for a bumper crop on Onions.

## Varieties

### CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

### SPANISH VALENCIA

(Or Sweet Spanish)—This variety can be grown in warm climates as successfully as the Bermuda varieties and much more successful in Northern climates. This is a large globe-shaped brownish yellow Onion of large size. The flesh is white, fine-grained, mild and sweet enough to be eaten like an apple. A good keeper and fine shipper when properly cured. Has been known to yield 1,200 bushels per acre.

Fulwood's Genuine Frost-Proof Onion plants are ready for shipment any time from September 1st to June 1st, following. All Onion plants are tied in bunches of 100 plants, and should be set out the same time. I will gladly mix an order, shipping part Onion plants and part Cabbage plants, if you desire.

### YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

Ready September 1st to June 1st

## WHAT FULWOOD CUSTOMERS SAY

I want to drop you a line to thank you for the nice plants and prompt service. Those plants were really better than expected. I will remember that next season.—J. D. Wilson, Plant City, Fla.

Want to let you know I had wonderful success with my first spring assortment order from you. The tomatoes, peppers, eggplants bore profusely and now I am digging up the yams and I wish you could see the size of some of them. Guess my fertile soil and your good plants just worked together and I can assure you a few orders next spring from my friends that saw and enjoyed eating mine. So please place my name of your list for a spring catalogue, or listing calendar, and oblige. Thank you.—Sam T. Schmitt, Branford Rd., North Branford, Conn.

Enclosed is our check for invoice 44-40. On ordering these we were very specific as to grade, etc. These plants were for the most critical grower we serve and he said they were the best plants he ever put in the field.

Just wanted to express our appreciation for service we have gotten from you and your organization.—Roy L. Bryant, Milan, Tenn.

I am one of your satisfied customers. I have bought your vegetables for two years and have had the best of luck. I canned over three hundred quarts of tomatoes last year. You can use my name if you want to. I am sending my order in soon.—Judith Meyer, Grass Lake, Antioch, Ill.

# FULWOOD'S Tomato PLANTS

Acres of tomato plants ready for shipping

Ready April 1st to June 15th

SHIP more Tomato plants than any other grower, shipping them by millions to practically every state in the Union, to both large and small canning factories, truck farmers, gardeners, and to individuals who grow tomatoes for their own use. I have developed these varieties to a very high state and my plants are exceptionally rooted, large and stocky. They are all open field grown and are acclimated to outside temperatures and will start growing quickly and produce rich, red ripe Tomatoes much earlier and more surely than home-grown plants. Tomato plants are not frost-proof, however, and should not be ordered shipped until all danger of killing frost is passed. My Tomato plants are not perishable and when packed as I pack them, in deep, damp moss, they will keep in good condition for several days.

In growing my Tomato plants I use the very finest Certified seed I can buy and plant only on new land. The plants are sprayed continuously to prevent disease, and when ready for shipment, plants are pulled one at a time and the roots are well wrapped in damp moss. These Tomato plants can be shipped successfully to all parts of the United States.

## DESCRIPTION OF VARIETIES OF TOMATO PLANTS

**GREATER BALTIMORE** is similar to the Stone, heavily productive and very valuable for canning. Fruits are scarlet-red, large, commonly weigh six ounces; deep but flat; smooth, very firm and solid.

**MARGLOBE** is a splendid type for earliness and uniformity; particularly valuable for shipping; definite disease-resistance recommends this type for use in sections infested with Fusarium Wilt and Nail-head Rust. Plants thrifty and heavily productive, of long bearing period. Fruits uniform deep scarlet; large; uniformly globe shaped; smooth, solid and of distinct quality.

**BONNIE BEST** is unexcelled as a general purpose Tomato; very valuable as a canning and shipping variety in northern sections. Fruits evenly colored bright deep scarlet-red; medium large; flattened globe shape; smooth and firm.

**PRITCHARD (SCARLET TOPPER)** is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

**RUTGERS** is highly recommended as a second early maturing variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

## FULWOOD'S PEPPER PLANTS

Not Frost-Proof. Ready April 1st to June 15th

**California Wonder Variety**—This is an outstanding medium large variety for market garden and shipping. Plants vigorous, prolific. Fruits 4-lobed, chunky; very attractive, smooth, uniform and deep green, changing to bright crimson; flesh thicker than any other variety, sweet and mild.

**PIMENTO VARIETY**—Pre-eminently a canning variety; good also for home and market garden planting. Plants large, erect, prolific. Fruits heart-shaped, very smooth; color dark green, changing to bright crimson; flesh exceptionally thick, sweet and mild.

Pepper Plant Prices		
Prices by parcel post, prepaid:		
12 plants for	\$.20

## FULWOOD'S HOT PEPPER PLANTS

(Not Frost-Proof)  
Ready April 1st to June 1st

**Long Red Cayenne Variety**—A favorite hot variety used largely for canning, and in pickles; also for drying. Plants large and productive. Fruits tapering, frequently twisted; very pungent; deep green changing to brilliant red.

**Hungarian Yellow Wax Variety**—A first early, hot sort, valuable for market gardeners and canners. Plants dwarf and prolific. Fruits medium slender, tapering, smooth and very pungent. Color waxy yellow changing to bright crimson at maturity.

Prices by parcel post, prepaid:
12 plants for \$.20
100 plants for 1.00
1,000 plants for 4.00

By express,  
\$3.00 per 1,000, any quantity.

## FULWOOD'S IMPROVED PORTO RICO SWEET POTATO PLANTS

(Not Frost-Proof)  
Ready April 1st to July 1st

Southerners who know their Yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who know Sweet Potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety.

Prices by parcel post, prepaid:
12 plants for \$.20
100 plants for .75
500 plants for 2.00
1,000 plants for 3.00

Prices by express, collect:	Per 1,000
1,000 to 4,000 plants	\$2.50
5,000 to 9,000 plants	2.25
10,000 plants and over	2.00

## FULWOOD'S EGGPLANT PLANTS

(Not Frost-Proof)

Ready April 15th to June 15th

**Black Beauty Variety**—I specialize on this one variety because it has many merits. It holds its color especially well, grows very large, has good shape and is of unusually good quality. The Black Beauty variety is naturally early, and if you will grow it from my fine plants your crop will be just that much earlier.

Prices by parcel post, prepaid:
12 plants for \$.20
100 plants for .75
500 plants for 2.00
1,000 plants for 3.00

Prices by express, collect:	Per 1,000
1,000 plants for \$2.50	
5,000 and over 2.00	

### PACKING HOUSE

Largest Packing House for vegetable plants in the world, contains 45,000 square feet of floor space.

### WHAT FULWOOD CUSTOMERS SAY

Just a line in appreciation of the very fine tomato plants I received yesterday noon. They were in perfect condition and I consider them a marvelous value. Thank you. Sincerely.—A. F. Worthley, Sherburn, Minn.

I enclose herewith order for plants together with remittance covering same.

The reason you are getting this order is because I ordered from you last year and the plants came through swell and were strong, vigorous and thrifty. They produced a fine crop on which I made some money.

You will receive other orders from me as the season progresses, as I expect to grow early, mid-season and late tomatoes this year. Your firm was originally recommended to me by a friend and, having had good plants from you last year, I do not hesitate to send you cash money for more plants. This shows, I believe, that I have confidence that you will again send me good stuff, and you will continue to receive my business as long as you send me high quality plants.—Paul C. Peck, Jackson, Michigan.

Last May I bought some tomato plants together with egg-plants and peppers.

I requested that they be packed exceedingly well and they were. The tomatoes are still bearing heavy and continue to hold their size very well.

Today we picked 56 30-lb. crates and truly I am greatly satisfied and you will continue to hear from me at planting time each year I farm and garden.—E. C. Wallace, 195th St. & N. Hempstead Tpk., Flushing, N. Y.

Please send your catalogue and price list of plants. I bought 3,000 tomatoes and 2,000 cabbage plants from you last year and had the best and finest tomatoes I ever grew. I believe I sent for Rutgers, Pritchards and Baltimores. I wish to get the smooth round tomatoes and as early as possible. I use hot caps on some of the earliest.—L. D. McCoy, Lexington, Nebr.

I received the cabbage plants shipped to me last Thursday, and will say they were the best plants I ever received from anyone, and the count was full—good measure and pressed down.—A. C. Fraser, Gordon, Ga.

I received cabbage and onion plants and I am pleased with them. I have been ordering plants from you for eight years and have always got good results. Please advise me by return mail wholesale prices on tomatoes, peppers and egg plants.—Theodore Miller, Martinsburg, W. Va.

Am enclosing an order for plants. We used your plants two years ago and were very well satisfied with them. Last year as cash was scarce at planting time, we sent for cheaper plants and needless to say we received cheaper plants, only about half of them grew and we had about six different cull varieties of tomatoes. So we are sending for your plants again. Would like the order shipped as soon as conveniently possible. Thanks for the lovely calendar.—Owen M. Ingle, Richwood, O., RFD No. 1.

### WHY I DO NOT MEET COMPETITION

There are so many plant growers using cheap seed that will not head satisfactorily and are not sprayed, kept free from insects, as mine are, therefore, I cannot meet these cheap prices. I put more into my plants to give a customer the very best to be had, and have figured my prices as low as good reliable plants can be grown.

Picture below shows a corner of seed testing and treating laboratories with Paul Fulwood, Jr., Pathologist in charge. This assures you plants free from disease or insects.

I reserve the right to substitute some other good variety or other kind of plants for any plants listed which I may be out of at the time your order is received. I believe I have ample plants of all kinds to fill all collection orders as listed, however.

#### 50c SPRING COLLECTION

1 Dozen Marglobe Tomato plants	\$.20
1 Dozen Sweet Pepper plants	.20
50 Porto Rico Sweet Potato plants	.40

2 Dozen Iceberg Lettuce plants	.40
2 Dozen Early Egyptian Beet plants	.40

Total value of this collection \$1.50

FROST-PROOF COLLECTION, Postpaid for \$1.00

### FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

● Vegetables sold early in the season bring many times the price of those marketed several weeks later, Fulwood's Genuine Frost-Proof plants produce from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

● Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot-bed, or cold frame plants.

● These Frost-Proof plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

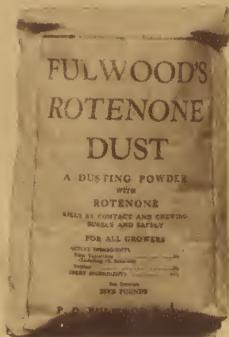

● Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crop—all ready for market during the time prices are high. Many unreliable growers are selling plants and calling them "Frost-Proof." In many instances these growers are located where they do not have frosts during the growing period and, therefore, the plants they are offering have never been subjected to the frosts.

#### PLANTING CHART

Fulwood's Vegetable Plants	Fulwood's Special Selected Varieties	Hardiness as to cold	Width of row in feet	Distance apart in drill in inches	Plants to set 100 to 150 ft. of row	Plants to set one acre
Cabbage	In order, early to late Early Jersey Wakefield Copenhagen Market Charleston Wakefield Early Flat Dutch Golden Acre	Frost Proof	3'	18"	100	10,000 Flat Dutch Others 12,000
Collards	Georgia Collards	Frost Proof	3'	18"	100	10,000
Onion	Yellow Bermuda Crystal Wax Spanish Valencia	Frost Proof	1 1/2'	3"-6"	200	60,000
Beets	Crosby Early Egyptian	Frost Proof	1 1/2'	4"	200	80,000
Lettuce	Iceberg	Frost Proof	2 1/2'	6"	200	35,000
Broccoli	Green Sprouting	Frost Proof	2'	24"	50	10,000
Brussels Sprouts	Long Island Improved	Frost Proof	2'	24"	50	10,000
Tomatoes	Greater Baltimore Marglobe Bonnie Best Pritchards Rutgers	Frost Kills	3'	30"	50	3,500
Sweet Potato	Porto Rico	Frost Kills	4'	12"	100	11,000
Eggplant	Black Beauty	Frost Kills	2 1/2'	24"	50	7,000
Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

**PLANTING NOTES:** When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread them out and place the roots in soft mud. In planting, pack the soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

# INSECT CONTROL NOW MADE EASY BY NEW METHOD

## FULWOOD'S NEW ROTENONE DUST

Kills by contact and stomach poisoning. (Not harmful to man.)

Fulwood's New 1% Rotenone Dusting Powder is effective for the following pests: Cabbage Worm, Diamond Black Looper, Leaf Tyer, Cabbage Lice, Mexican Bean Beetle, Colorado Potato Beetle, Tomato Bug, Asparagus Beetle, Tomato Horn Worm, Bean Leaf Hopper, Flea Beetle, Thrips, Celery Leaf Tier, Gay Rose Bug, Web Worms, Plant Lice.

**FULWOOD'S NEW ROTENONE DUST** should be applied in dry weather, the plants, however, must not necessarily be dry, as its effectiveness is not lost on wet plants. The maximum kill is obtained in one to three days, according to weather conditions.

A good hand or power duster of the usual type is satisfactory for use.

For best results plants should be dusted as soon as pests appear and repeat (until controlled) as needed. It is advantageous to dust at regular intervals about every seven days. Proper application and as complete coverage as possible helps in securing successful control of the pests being treated. Both lower and upper sides of the plant growth should be thoroughly dusted. The kind and age of the plants being treated will determine the amount of dust required. The quantity will vary from 15 to 25 pounds per acre.

We guarantee the composition is accurately stated in the analysis on this package. There is no guaranty or warranty either expressed or implied as to results to be obtained from the use of these goods. Climatic and soil conditions and other factors beyond the Seller's control necessarily affect results. The Buyer agrees that the Seller shall not be responsible or liable for injuries to crop, soil, person or property arising out of the use or handling of this material whether in accordance with directions or not.

## Guarantee

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled one at the time, counted and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.
